

# How climate change affects rural Spain (Workshop)

## *Activity 1.*

<b>Name of the activity:</b> Kahoot activity.
<b>Duration:</b> 10 minutes.
<b>Objectives:</b> <ul style="list-style-type: none"><li>➤ Know the previous knowledge of the target group.</li><li>➤ Provide impressive information about agriculture and climate change to catch the target group attention.</li></ul>
<b>Description:</b> <p>Kahoot is a game-based learning platform with multiple-choice quizzes. Each person can join the quiz with their Smartphones in a simple way. With the Kahoot App, we will analyse the previous knowledge of the target group and show impressive data and facts about climate change.</p> <p>Water-wasting, agriculture knowledge, climate change consequences and foodstuff oligarchy are some of the topics that we want to emphasize.</p>
<b>Resources:</b> Computer, Smartphones, projector.
<b>Variants:</b> To future target groups, questions could be modified to adapt the content of the quiz.

## *Activity 2.*

<b>Name of the activity:</b> Individual contribution to mitigate climate change consequences.
<b>Duration:</b> 10 minutes
<b>Objectives:</b> <ul style="list-style-type: none"><li>➤ Promote the individual actions to reduce and mitigate the effects climate change.</li></ul>
<b>Description:</b> First, we are going to ask the target group about them actions they made to reduce climate change in their daily lives. They have to write these actions and then share them with their groups making discussions. At the end we will teach them other possible unknown actions easy to bring them to practice.
<b>Resources:</b> Papers, cardboards, computer, projector.
<b>Variants:</b> To future target groups, actions could be modified to adapt the content of the quiz.
